

Important Update re: COVID-19

from Gil Fonger, President & CEO

Oct. 4, 2021; 11 a.m.; Issue 120

- **Positive case at Geneva Campus**

We have been informed that an employee working at the Hyde Center campus has tested positive for COVID-19. This person, who is unvaccinated, worked Thursday night at the Richard (MRH) and Dreher (MDH) homes, and had an offsite lab test completed.

Due to this positive case, both MRH and MDH have been placed on outbreak status. All residents of those homes are being PCR tested today while staff will have rapid tests. Contact tracing for staff who worked that overnight shift has been completed.

Community Day Services (CDS) for the residents of the two affected homes will be held in the homes until two rounds of negative tests taken five to seven days apart are obtained for those residents.

Outings and day passes have been suspended and visits will be restricted to outdoor on the patio for the time being.
