

## Important Update re: COVID-19

### *from Gil Fonger, President & CEO*

Jan. 13, 2022; 3 p.m.; Issue 157

As we have seen over the past few weeks, the number of positive cases continue to rise and fall. For a few days we had slowed down, but today, we're back to an uptick. But overall we're expecting the cases to decrease in the coming weeks.

- **New staff cases:**

- **Marklund Day School (MDS) Bloomingtondale:** 1) Two day school employees tested positive after symptoms developed post exposure at work. One is fully vaccinated/boosted, the other is not boosted. Both last worked on Jan. 7

- 2) A third school staff member (vaccinated/not boosted) tested positive after a work exposure and is currently asymptomatic. This person last worked Wednesday, Jan. 12, until received results.

- **Philip Center (MPC), Bloomingtondale:** 1) A direct care employee (vaccinated/boosted) received positive results yesterday from PCR surveillance testing on Jan. 10. This individual is currently asymptomatic and last worked Monday's overnight shift.

- **Sayers Home (MSH), Geneva:** A direct care employee (unvaccinated) tested positive after developing symptoms on Monday, Jan. 10. This person last worked Saturday, Jan. 8.

- **Wasmond Center, (MWC), Elgin:** A direct care employee (vaccinated/not boosted) tested positive today via rapid after experiencing symptoms. PCR test results from an offsite test on Jan. 8, are still pending. This person last worked yesterday.

- **New resident cases:**

- **MWC:** Positive results from PCR testing completed on Tuesday, Jan. 11, came in today for four MWC residents. One resides on the facility's South Side, is vaccinated/boosted and currently asymptomatic. The other three reside on the North Side. One is unvaccinated and currently asymptomatic; the others are vaccinated/boosted, although one is asymptomatic while the other has mild symptoms.

- **MPC:** One resident (vaccinated/boosted) tested positive from outbreak testing and is currently experiencing mild symptoms.
