Important Update re: COVID-19

from Gil Fonger, President & CEO

April 18, 2022; 3 p.m.; Issue 177

- **Positive employee in Bloomingdale**

- **Marklund Philip Center (MPC)**: A direct care employee (fully vaccinated/ boosted), received positive results this weekend from a PCR taken after symptom onset late Wednesday. This person had last worked Sunday, April 10, and was not in the building during the 48 hours prior to symptom onset, so this is not considered facility-based and will not put MPC into Outbreak Status.

- **CDC Community Transmission Rates Increase**

As of today, Cook and DuPage counties are both at "High" transmission levels, and Kane is at "Substantial" which means staff at all three of our campuses should continue with eye protection and two-times-per-week surveillance testing for staff who are not fully vaccinated.

Hopefully, this upward trend of more cases is short lived and reverses course once we can get into warmer weather patterns.
