Staff test positive in offsite cases

Marklund Hyde Center (MHC), Geneva, Marklund Philip Center (MPC) Bloomingtondale: Three direct care staff members tested positive recently for COVID.— one from MHC (symptomatic) and the other two from MPC (one asymptomatic and one with symptoms). In all three situations, each employee had not been onsite during the 48-hour “infectious period” prior to testing positive so all three are considered non-facility based. No residential facilities are involved in any of these cases.

Thank you —
