

Important Update re: COVID-19 *from Gil Fonger, President & CEO*

Jan. 9, 2023; 3 p.m.; Issue 291

Positive cases in Bloomingdale, Geneva & Elgin

Marklund Philip Center (MPC), Bloomingdale:

Three MPC residents tested positive this morning after developing symptoms. MPC is doing broad-based testing (every 3-7 days until no new positives are discovered for 14 days) so the current outbreak date is 1/24/23.

Marklund Haverkamp Home (MHH), Geneva:

A direct care employee tested positive yesterday after symptom onset. This puts MHH into outbreak to Jan. 12 at the earliest. So far, no residents or additional staff have tested positive at that home.

Marklund Wasmond Center (MWC), Elgin:

An MWC employee, tested positive via rapid on Jan. 4, and received a confirmed positive via PCR today. This person did not work during the 48-hour pre-infectious period, so this is not a facility-based case and MWC is not in outbreak.

Thank you,

GILBERT FONGER, President & CEO,
